# LibraryView™ 1.2 Software

**Release Notes**

AB Sciex Pte. Ltd.
Blk 33, #04-06
Marsiling Ind Estate Road 3
Woodlands Central Indus. Estate.
SINGAPORE 739256

# Contents

# Introduction 1

## Features

- The LibraryView™ software provides workflows for building chemical compound libraries.

- Enhanced spectral matching (% purity) for MRM (multiple reaction monitoring), EMS (enhanced mass spectrum), IDA (information dependent acquisition), *Scheduled* MRM™, SWATH®, and MRM$^{HR}$ acquisition workflows is also provided.

## Changes from Version 1.1 to Version 1.2

### Compatibility

- This release of the LibraryView™ software is compatible with SCIEX OS 1.2.

  **Note:** This release is not compatible with earlier versions of SCIEX OS. In addition, this release is not compatible with any version of the Analyst® software or with any vertical applications such as the Cliquid® software and the MasterView™ software.

## Requirements

- The LibraryView™ software requires an English version of the Microsoft Windows 7 64-bit operating system, with or without SP1.

- Microsoft Office 2010 or 2013.

  **Note:** If a trial version of Microsoft Office is installed on the computer as a temporary measure, then the full version of the Microsoft Office software must be activated before the trial period expires. The license can be purchased from your regional division of Microsoft or from an authorized distributor in your region.

# Where to Get Help

## Other Documentation

| Document | Description |
|---|---|
| Installation Guide | Provides procedures for installing and activating the LibraryView™ software. |
| Quick Start Guide | Provides quick reference information for the tasks most frequently performed by the user and a list of common terms and their definitions. |
| Help | Provides procedures for all of the tasks that can be performed by the user, using the LibraryView™ software. |

# Contact Us

**SCIEX Support**

- sciex.com/contact-us

- sciex.com/request-support

**Customer Training**

- In North America: NA.CustomerTraining@sciex.com

- In Europe: Europe.CustomerTraining@sciex.com

- Outside the EU and North America, visit sciex.com/education for contact information.

**Online Learning Center**

- SCIEXUniversity

# Technical Support

SCIEX and its representatives maintain a staff of fully-trained service and technical specialists located throughout the world. They can answer questions about the system or any technical issues that might arise. For more information, visit the SCIEX website at sciex.com.

# Known Issues and Limitations    2

---

**Note:** Refer to the *LibraryView*<sup>TM</sup> *Software Installation Guide* for a list of potential software installation issues and the recommended solutions.

---

**Note:** The numbers in brackets are reference numbers to each issue in the SCIEX internal tracking system.

---

- Occasionally, when a Cliquid® software compound package is imported using the **Cliquid Package (*.clq)** option on the Library Importer dialog, duplicate retention times are added to the compound database. As a preventive measure, we recommend that before beginning the import, the user export the compound database to a LibraryView<sup>TM</sup> software package using the **LibraryView Package (*.lbp)** option on the Library Exporter dialog. After the export is completed, import the Cliquid® software compound package and then import the LibraryView<sup>TM</sup> software package and select the **Merge** option on the Library Importer dialog. (LBV-74)

- When a spectrum is added to a compound, it is only shown in the **Grid** view and the **List** view. It is not visible in the **Stack** view. (LBV-116)

- **Zooming the View**  (LBV-119)

  - The zooming feature for graphs is only available in the **List** view. Zooming of graphs is not available in the **Stack** view or the **Grid** view.

  - When the TIC or XIC view is maximized, the zooming feature becomes unresponsive. To unlock the zoom view, click any sample name shown in the Search pane.

  - When the Acquired Spectrum pane is maximized, the zooming feature becomes unresponsive. To unlock the zoom view, click anywhere inside the Searched Spectra pane.

  - Occasionally, when the user alternates between the TIC and the XIC and then attempts to switch between Experiment 1 and Experiment 2 in the TIC pane, the view becomes locked and does not switch between the chromatograms in Experiment 1 and Experiment 2. To unlock the view, click the Sample Name in the Search pane.

  - Occasionally, the TIC does is not shown correctly (shows spectral-like data rather than chromatographic peaks). To show the TIC correctly, click anywhere inside the Search pane to refresh the chromatogram.

- When a licensed package of compound information that was created with the LibraryView Package Builder 1.0 is installed and then activated, the license file is saved to the C:\Program Files\AB SCIEX\LibraryView\bin folder. The license file must be manually copied to the C:\Program Files\SCIEX\LibraryView\ LibraryViewFramework\Server folder. (MQ-1847)

  **Note:** When licensed packages of compound information are created using the LibraryView Package Builder 1.1 or higher and then installed and licensed, the license file is saved to the correct folder. No user intervention is required.

# Revision History

| Revision | Reason for Change | Date |
|:---:|:---|:---:|
| N/A | First release of document. | July 2012 |
| A | Applied new template. Removed all references to library searching capabilities. Updated Features section. Added Changes from Version 1.0 to Version 1.1 section. Updated Requirements section. Updated the Known Issues and Limitations section. | April 2016 |
| B | Replaced Changes from Version 1.0 to Version 1.1 section with Changes from Version 1.1 to Version 1.2. Updated Requirements section. Updated url for Online Learning Center. | February 2017 |
